

To: Dealer service managers and customer equipment managers
Re: Training and Installation assistance of Connect Work Tools (CWT)

Clear Form

In today's market, there are many choices when it comes to Demolition Equipment. Here at Connect Work Tools, we would like to make your experience as pleasant as possible. We would like to thank you for your purchasing our Connect Work Tools attachment.

We would like to offer training and installation assistance of your attachment. Training will included complete installation, inspection, troubleshooting, operational recommendations, maintenance, breaker storage as well as other necessary information for successful utilization of your breaker.

If you would like to decline our training, this option is only for customers who feel they have a sufficiently trained staff on Connect Work Tools hammers and can handle trouble shooting in the field and shop and do not need assistance to identify a breaker issue and work with our team long distance to solve the problem. However, if your staff has not been trained and you opt out of service, you also understand that will be taken into consideration regarding any possibly warranty claims in the future.

Customer: _____ Contact: _____

No, we do not need assistance at this time. We feel comfortable with our ability to install and complete the warranty registration form.

A service class must have the agreed amount of technicians and the agreed machine with breaker and hoses installed to test on the unit. Failure to have this the day of the class will result in an insufficient training and noted in our records as well as a written copy sent to the branch. A future service training could be the financial responsibility of the branch to receive a completed service training in the same calendar year.

Number of attendees: _____ Flowmeter installed: Yes No

Customer Name Company Name	Model	Serial Number	Date of Installation	Date of Training

Make of machine used in training: _____ Model: _____ Model Breaker used: _____

Recieved by: _____
