CHG Series Highlights

1 Auto Shut Off (ASO)

Protects hammer from blank firing. Instantly stops the hammer operation when breaking through material. Activation of ASO can be easily adjusted to the working environment.

2 Rotatable / Slip-fit Tool Bushing

Field replaceable tool bushing provides multiple wear surfaces reducing replacement costs.

3 Boxed Housing Design

CHG series breakers can come as a boxed style which protects the powercell by fully enclosing the breaker. It also helps reduce operational noise.

MODERNIZE YOUR FLEET

CONNECT 1 Features:

- GPS Location, with bread crumb history
- Temperature detection
- Burst data (trigger time)
- Utilization (daily, weekly, monthly)
- Device health alerts (low battery, signal strength, etc)
- Alarm detection (shock, motion, G force, etc)
- Daylight/Dark detection
- Event history
- Geo-fencing

CONNECT 1 is a revolutionary new wireless telematics device that gives you detailed diagnostic data on the attachment it's connected to.

Imagine being able to track location, track working time, and monitor the health status of your attachments!

CH Series Highlights

1 N2 Gas Charged Accumulator
Rechargeable N₂ gas accumulator assists power stroke and reduces the surge pressure and spikes from the hydraulic circuit of the excavator.

2 Lubrication Systems
All CH Series Breakers offer top down lubrication, breaker mounted.

3 Piston
Efficient Power Transfer. The oil flow allows for optimum transfer of blow energy into the material and reduces recoil.

CH Series has the most efficient piston design for maximum energy transfer and recoil reduction, with an ideal match of tool and piston diameters. It transfers the highest shock wave into the breaking objects.

4 Boxed Housing
Housing reduces decibel levels and provides maximum protection to the breaker. Replaceable wear plates protect the power cell and internal housing.

Anti-Blank Fire (ABF) System (not pictured)
ABF increases the lifespan of all components subject to wear and fatigue and reduces stress on the main carrier and breaker.
(Available on most Medium/Large Series Breakers)

5 Top Buffer
The top buffer acts as a vibration absorber to prevent impulses between the carrier and the breaker.

6 Oil Flow Control Valve
Control valve regulates the flow of hydraulic oil for maximum performance regardless of flow variations. (Large Series)

Check Valve
Check valve prevents back oil flow and reduces unnecessary spikes from the hydraulic circuit. (Medium Series)

7 Built in Pressure Port
Allows quick access with included adapter to easily read the operating and back pressure of hammer without removal of hoses.

8 Compact Cylinder Design
Allows the breaker to have a narrow profile to improve operator visibility.

9 Wear Plates
Wear resistant plates between cylinder, front head, and housing increase overall product durability.

10 Field Replaceable Tool Bushings
The Power Cell does not need to be removed from the housing to replace the bushing. This allows for easy serviceability to keep the breaker bushing within spec and with minimal down time.

CWP SERIES PULVERIZERS

As a manufacturing partner with **OilQuick Americas[®]**, all Connect attachments can be fitted with an automatic quick coupler

360° hydraulic rotation kit available. Allows for changing from non-rotating to rotating

Internal speed valve allows for faster cycle times (not shown)

Cutter has 4 edges - rotate cutting edges for longer use

One-piece replaceable tooth plates
Teeth are made of Hardox Steel

CM SERIES MAGNETS

- Used in demolition, scrap, waste, C & D, and railroad applications
- CM Electromagnets models are equipped with a plate for quick hitch and can be attached without manual intervention
- The teeth on the CMID are designed to rake debris, making it easier to extract ferrous materials.
- Teeth on the CMID are equipped with a quick fitting device and are easy to replace

- Sorting C & D Debris
- Waste/Recycling
- Storm Clean up
- Select Demolition
- High Reach Demolition
- Landscaping
- Transfer Stations
- Road Maintenance
- Truck/Railroad Cranes

CC SERIES COMPACTORS

CWT's CC Compactor Series has integrated flow control valves, and self aligning bearings with a maintenance-free oil lubrication system.

The CC series has compatible mounting brackets for the CH Breaker and CG Grapple Series.

ROCKWHEEL

Rock & Concrete grinder attachments that offer precision cutting and grinding for many applications

DEMOLITION

TRENCHING

ROCKCRUSHER

On-Site & Mobile Crushing Attachment

With the Rockcrusher, material can be crushed directly on site. Disposal and transportation costs to stationary crushing plants are avoided. Operation cost is **less than \$1 per ton** of processed material (including fuel and maintenance costs).

REBUILD SERVICE

Our breaker Service Center in Texas offers rebuild service on CWT breakers and most other top-tier equipment brands

Our commitment to transparent and open communication is at the core of our rebuilding service. We utilize a comprehensive diagnostic form and capture images of any damaged components, ensuring a highly visible, well-documented record stored in our customer database.

Before returning any repaired breakers to you, we subject them to rigorous testing and keep detailed records of their performance. Additionally, all our rebuild services come with a 90-day warranty for your peace of mind.

Complementing our rebuild facility is our investment in top-tier field service personnel. From on-site installation support to tailored training programs for dealers and end users, we provide a comprehensive suite of services that sets us apart.

PARTS

We understand the need to keep your investment up and running.

Our Texas facility is fully stocked with replacement parts for Connect Work Tools and RockZone attachments.

We offer same day shipping on most parts.

In addition to standard parts, we offer customization kits for special applications:

- Combo brackets
- Solida® tool bits for most major brands
- Specialty tools
- Plating kits
- Rebuild kits
